ADDITIONAL MODIFICATIONS

Page 3: The following requirement has been added to the Admissions Requirements and Procedures policy:

For programs that include distance education components, applicants must complete the Wonderlic Admissions Risk Profile Survey and successfully complete a non-credit, online orientation to become acquainted with the virtual classroom environment in which courses will be delivered. The asynchronous online orientation is available to applicants once Remington College has received an Application for Admission executed by the applicant and must be completed prior to the beginning of classes.

Page 4: Item 4) of the admissions requirements has been amended to remove the Medical Assisting diploma program. The campus is no longer enrolling ATB students in the Medical Assisting diploma program.

Page 4: Item 4) of the admissions requirements has been amended to include the Medical Office Administration diploma program. Applicants without a high school diploma or equivalent may be admitted to the Medical Office Administration diploma program under an Ability-to-Benefit determination and must meet and comply with all applicable requirements and policies as set forth in the Catalog. As a condition of graduation from the Medical Office Administration program, each ATB student must make at least one attempt at the GED test prior to completing the postsecondary training.

Page 5: The first two bullet points under the Attendance Requirements for Activation have been amended as follows:

- *For applicants enrolled in courses delivered residentially: Attend at least one class on at least 50% of the days classes are scheduled in the first or second week of the term.*
- *For applicants enrolled in only courses delivered via distance education (on-line): log into the online classroom at least once during first two weeks of the term.*

Pages 9-10: The Tuition and Additional Fees policy has been amended to include the following:

- *Replacement of Degree/Diploma Fee: Graduates will be charged \$45.00 for a duplicate copy of their degree/diploma.*
- *Transcript Fee: Upon completion of the program, graduates will receive one official transcript free of charge, unless the graduate has unpaid financial or other remaining obligations to Remington College. Any additional transcript requests will be charged \$45.00 per transcript for official transcripts and \$25.00 per transcript for unofficial transcripts.*
- *Student Verifications: Students will be charged \$25.00 per enrollment verification.*

- Page 18: The following has been added to the Educational Equipment section:
- *Computer-Aided Design and Drafting equipment may include: drafting tables, drafting kits with tools for basic board drafting, computer(s), computer-aided drafting software, and printer(s).*
 - *Facility maintenance course equipment may include: water heater(s), electrical board(s), trainer(s), appliances, HVAC/R equipment, and boiler(s).*
 - *Medical Office Administration course equipment may include: computer(s) with medical office simulation software.*

- Pages 21, 29: & 46-47: The program descriptions for the Heating, Ventilation and Air Conditioning diploma and AAS degree programs and the Course Descriptions have been amended to include the course number and title changes outlined below.
- HV115 Introduction to HVAC and Refrigeration is now HV102 Basic Refrigeration Theory
 - HV135 HVAC Automation Controls is now HV132 Basic Electricity
 - HV155 Residential Systems I is now HV152 Residential Heating
 - HV165 Residential Systems II is now HV162 Residential AC
 - HV175 Commercial HVAC Systems is now HV172 Introduction to Air Conditioning and Major Components
 - HV205 Ducting and Airflow is now HV202 Ventilation and Air Flow

- Pages 46-47: The prerequisites courses for HV142-HV209 have been amended as follows:
- *Prerequisite(s) for HV142 and HV152: HV132*
 - *Prerequisite(s) for HV162: HV102, HV132*
 - *Prerequisite(s) for HV172: None*
 - *Prerequisite(s) for HV182 and HV195: HV102, HV132, HV172*
 - *Prerequisite(s) for HV200 and HV209: HV102, HV125, HV132, HV142, HV152, HV162*
 - *Prerequisite(s) for HV202: None*

- Page 53: The Leave of Absence policy has been amended to read as follows.

Remington College will allow a student enrolled in a program to apply for a leave of absence ("LOA") from their program of up to one hundred fifty (150) calendar days from the students last date of attendance prior to the commencement of the LOA. A student is only eligible for one LOA during each program of study. A LOA may only start at the beginning of a module. A written request for a LOA must be submitted by the student on an LOA Application Form which may be obtained from the Campus Dean or Administrator. An LOA will not be granted unless Remington College's Provost (or designee) determines that there is a reasonable expectation the student will resume their program within the LOA period. Students enrolled in programs that are being discontinued will not be granted a leave of absence if, upon returning from a leave of absence, the student will not be able to complete the program prior to its termination because of limited course availability. All LOA requests must be reviewed and approved by Remington College's Provost (or designee). If a medical emergency prevents the student from applying in writing in advance, the Provost (or designee) may approve an exception, in his/her sole discretion, based on the individual circumstances. A student's failure to return from a leave of absence may impact the loan repayment terms of a student's Title IV program loans including the exhaustion of the student's entire grace period.

- Page 57: The following requirement has been added to the Graduation Requirements:

ATB students in the Medical Office Administration program must attempt the GED test.

- Page 59: The Grade Adjustments Due to Excessive Absences in Residential Courses section of the Attendance Policy has been replaced with the policy provided below.

Grade Adjustments for Participation in Residential Courses
The maximum grade a student will be eligible to receive for each course in the student's program will be based upon class participation. Students should monitor their participation grades in their canvas course. Active participation in the course includes participating in classroom discussions, lab participation, and attending class regularly.

- Page 70: The Examination of Student Records policy has been amended by adding Academic and Attendance Awards as a category of student information that Remington College has designated as "directory information."

- Page 73: The list of Directors and Officers has been replaced with the following list.

COMPUTER-AIDED DESIGN AND DRAFTING

DIPLOMA

12 Months

The Computer-Aided Design and Drafting Diploma Program provides training in the application of drafting skills to mechanical, electrical, piping, civil, structural and architectural disciplines. The curriculum also covers information in related fields, with the intent to position students to work effectively with engineers, technologists, architects, and other professional staff.

The objective of this Program is to prepare graduates for entry-level draftsman positions in which computer programs and/or a manual drafting board are used.

Program completion normally requires 12 months for full-time students.

The Computer-Aided Design and Drafting Diploma Program is divided into 12 monthly academic periods.

Upon successful completion of all areas of this Program, graduates will be awarded a Diploma in Computer-Aided Design and Drafting.

FACILITY MAINTENANCE

DIPLOMA

9 Months

The Facility Maintenance program provides training for servicing, maintaining, and operating a variety of equipment commonly found in residential and commercial facilities. The program also provides training on how to maintain and repair facility infrastructure and mechanical equipment such as carpentry, HVAC, and electrical.

The objective of this Program is to prepare graduates for entry-level positions in the Building Maintenance industry in areas such as residential living facilities, hospitals, commercial retail, office buildings, high-rise communities, hotels and schools, as well as working independently in variety of maintenance areas.

Program completion normally requires 9 months (36 weeks) for full-time students.

The Facility Maintenance Program is divided into 9 monthly academic periods. Upon successful completion of all areas of this Program, graduates will be awarded a Diploma in Facility Maintenance.

FACILITY MAINTENANCE AND TECHNOLOGY
ASSOCIATE OF APPLIED SCIENCE
 21 Months

The Facility Maintenance and Technology program provides training for servicing, maintaining, and operating a variety of equipment commonly found in residential and commercial facilities. The program also provides training on how to maintain and repair facility infrastructure and mechanical equipment such as carpentry, HVAC, and electrical.

The objective of this Program is to prepare graduates for entry-level and mid-level positions as well as advancement opportunities in the Building Maintenance and Building Management industry in areas such as residential living facilities, hospitals, commercial retail, office buildings, high-rise communities, hotels, schools, as well as working independently in variety of maintenance areas.

The Facility Maintenance and Technology Program requires completion of a minimum of 94 Quarter Credit Hours including any credits that have been accepted for transfer credit. Program completion normally requires 21 months.

The Facility Maintenance and Technology Program is divided into seven three-month quarters, which are delivered in a hybrid format. Some courses are delivered residentially and some courses are delivered via distance education (i.e., on-line).

Upon successful completion of all areas of this Program, graduates will be awarded an Associate of Applied Science Degree in Facility Maintenance and Technology.

MEDICAL OFFICE ADMINISTRATION

DIPLOMA

8 Months

The Medical Office Administration Diploma Program provides training in administrative procedures used in medical offices, many of which are also applicable to other office settings. The training includes, but is not limited to, instruction and training in scheduling, medical records management, billing and collection, and the basic elements of billing and coding for the healthcare and insurances industries, as well as general organizational and office skills.

The objective of this Program is to prepare graduates for entry-level positions such as admissions clerk, front office assistant, insurance coordinator, insurance verification clerk, medical administrative assistant, medical assistant, medical office administrator, medical office assistant, medical billing clerk, medical billing specialist, medical collections clerk, medical claims collector, medical receptionist, medical records clerk, patient access representative, patient account representative, or patient services representative, in work locations such as hospitals, clinics, nursing homes, medical supply businesses, and home health agencies.

This Program requires completion of a minimum of 48 quarter credit hours. Program completion normally requires 8 months for full-time students. The Program is divided into eight monthly academic periods (modules).

Upon successful completion of all areas of this Program, graduates will be awarded Diploma in Medical Office Administration.

COURSE DESCRIPTIONS

- CAD115** **Manual Drafting** **5.00 Quarter Credit Hours**
40/40/0
This course is an introduction to drawing fundamentals and drafting equipment, with an emphasis on manual drafting techniques and basic industry standards. The course is designed to build students' understanding of the principles of dimensioning and perspective. Students also receive instruction in how to read manual drafts or drawings so that they can be converted into computerized drawings.
Prerequisite(s): None
- CAD125** **Computer-Aided Drafting I** **5.00 Quarter Credit Hours**
40/40/0
This course is designed to introduce students to the operation of a 2D computer-aided drafting (CAD) program. Emphasis is placed on the commands and operation of the software as applied in 2D drawings. Topics include setting up drawings; creating and modifying geometry; storing and retrieving predefined shapes; placing, rotating, and scaling objects; adding text and dimensions; using layers; coordinating systems; and operating input and output devices.
Prerequisite(s): None
- CAD135** **Computer-Aided Drafting II** **3.50 Quarter Credit Hours**
20/40/0
This course continues to explore the use of a computer-aided drafting (CAD) program to produce 3D objects. Students have the opportunity to gain an understanding of the features, limitations, and considerations associated with the operation of a 3D CAD program. Emphasis is placed on the commands and operation of the software as applied in 3D drawings. Topics include setting up drawings; creating and modifying geometry; storing and retrieving predefined shapes; placing, rotating, and scaling objects; adding text and dimensions; using layers; coordinating systems; and operating input and output devices.
Prerequisite(s): CAD115, CAD125
- CAD145** **Structural Drafting** **5.00 Quarter Credit Hours**
40/40/0
This course explores structural drafting for steel and wood applications and covers beam shapes and identification, standard and seated-beam connections, sectioning, fastening systems, and dimensioning practices.
Prerequisite(s): CAD1125, CAD135
- CAD155** **Architectural Drafting I** **5.00 Quarter Credit Hours**
40/40/0
This course focuses on the principles and applications of computer-aided architectural drafting. Students begin designing a working set of house plans by applying the learned principles of architectural drafting. The plans are scheduled to include a floor plan, a foundation, a wall-section drawing, a roof plan, and an electrical layout diagram. Students also have the opportunity to begin drafting an elevation plan, a two-point perspective drawing, and a plot plan for incorporation into the final drafts.
Prerequisite(s): CAD115, CAD125
- CAD165** **Architectural Drafting II** **5.00 Quarter Credit Hours**
40/40/0
This course continues the design of a working set of house plans by applying the learned principles of architectural drafting. The completed plans are scheduled to include a floor plan, a foundation plan, a wall-section drawing, a roof plan, and an electrical layout diagram. Students also have the opportunity to incorporate an elevation plan, a two-point perspective drawing, and a plot plan into the final drawings.
Prerequisite(s): CAD125, CAD135, CAD155
- CAD175** **Mechanical Drafting I** **5.00 Quarter Credit Hours**
40/40/0
This course involves the study and application of mechanical drafting techniques and geometry using computer-aided design software. Topics of study include the identification, use, and function of mechanical and machine components. Students receive instruction in how to design and draft machine elements such as threaded objects, gears, cams, and linkages.
Prerequisite(s): CAD125, CAD135
- CAD185** **Electrical and Electronic Drafting** **5.00 Quarter Credit Hours**
40/40/0
This introduction to electrical and electronic drafting and design is intended to expose students to electronics applications and electrical drafting fundamentals. The drafting skills covered are directly related to the development of electrical, electronic, and electromechanical drawings. Students have the opportunity to learn the basic applications of electronic theory and symbology needed for drafting electronic circuitry. Electrical calculations are also addressed to offer students a background in calculating or computing proper electrical loading and wires for specific wiring applications in steel and wooden structures.
Prerequisite(s): CAD125, CAD135
- CAD192** **Pipes and Piping** **5.00 Quarter Credit Hours**
40/40/0
This course involves the study and application of commercial and residential plumbing and piping. Students have the opportunity to learn how to use a computer-aided design program to draw layout and assembly applications for pipes, fittings, and valves used in wooden and steel construction.
Prerequisite(s): CAD125, CAD135
- CAD215** **Mechanical Drafting II** **5.00 Quarter Credit Hours**
40/40/0
This course continues the study and application of mechanical drafting techniques and geometry using computer-aided design software. Students receive continued instruction in how to design and draft machine elements such as threaded objects, gears, cams, and linkages. The use of three-dimensional forms, geometric tolerances, and dimensioning practices is also reinforced.
Prerequisite(s): CAD125, CAD135

CAD225	5.00 Quarter Credit Hours
Civil Drafting and Mapping	40/40/0
This course covers the basics of civil drafting and mapping technology, including survey types, plots, plans and profiles, contours, and earthworks. Mapping technology includes mapping scales and symbols, surveying types and fundamentals, and understanding location and direction, legal descriptions, plot plans, contour lines, profiles, and highway layouts.	
<i>Prerequisite(s): CAD125, CAD135</i>	
CAD235	3.50 Quarter Credit Hours
Career Portfolio	20/40/0
In this final course, students have the opportunity to develop a portfolio of drafting designs learned and used throughout the Program. The drawings in the portfolio are representative samples from each drafting discipline studied. Additional instruction focuses on job search techniques and how to present oneself and one's work to potential employers.	
<i>Prerequisite(s): CAD115-CAD225</i>	
FM100	3.50 Quarter Credit Hours
OSHA and LEED	40/20/0
This course presents the 10 Hour OSHA training as well as introductory information on LEED and energy efficiency. The course will also cover various environmental trends in the construction and trades industry.	
<i>Prerequisite(s): None</i>	
FM105	3.50 Quarter Credit Hours
Small Power Equipment and Appliances	40/20/0
This course presents the basic operations and maintenance of small power equipment commonly used in a facilities maintenance role. The course will also provide basic training on repair and maintenance of small appliances.	
<i>Prerequisite(s): None</i>	
FM110	5.00 Quarter Credit Hours
Facility Maintenance I - Residential	40/40/0
This course presents training on the role of a facilities maintenance worker in a residential setting. Topics covered will include customer service, time management, practical lab work in performing basic maintenance and repairs, and general preparation for potential positions in residential facilities maintenance.	
<i>Prerequisite(s): None</i>	
FM120	5.00 Quarter Credit Hours
Facility Maintenance II - Commercial	40/40/0
This course presents training on the role of a commercial facilities maintenance worker in a residential setting. Topics covered will include customer service, time management, practical lab work in performing basic commercial maintenance and repairs, and general preparation for potential positions in commercial facilities maintenance.	
<i>Prerequisite(s): None</i>	
FM130	5.00 Quarter Credit Hours
Electrical	40/40/0
This course presents training on basic safety for electrical work as well as performing electrical repairs and installation. Other topics will include electrical terminology, residential installation and code requirements, how to research and troubleshoot residential electrical issues. Learners will perform residential electrical work in a lab setting.	
<i>Prerequisite(s): None</i>	
FM140	5.00 Quarter Credit Hours
Carpentry and Finishing	40/40/0
This course presents information about carpentry installation and repair in residential and commercial environments. Learners will practice basic safety and carpentry skills in a lab setting. Other topics include: basic finishing work, drywall repair and installation, and commercial and residential code compliance.	
<i>Prerequisite(s): None</i>	
FM150	5.00 Quarter Credit Hours
Plumbing	40/40/0
This course presents plumbing terminology, troubleshooting processes, as well as installation and maintenance training and experience in lab setting. This course will also provide valuable information regarding plumbing code compliance.	
<i>Prerequisite(s): None</i>	
FM200	3.50 Quarter Credit Hours
Green Applications	36/12/0
This course presents information on trending building systems with an emphasis on energy efficiency, alternative energy sources, and environmentally responsible building and maintenance solutions.	
<i>Prerequisite(s): None</i>	
FM210	3.50 Quarter Credit Hours
Security and Building Safety	36/12/0
This course presents information on the use and maintenance of trending facility security systems, security plans, building safety planning, and industry trends in Smart Home and Wired/Wireless Safety Systems.	
<i>Prerequisite(s): None</i>	

FM220	3.50 Quarter Credit Hours
Programmable Logic Controllers and Automation	36/12/0
This course presents information on the use, maintenance, and repair of programmable logic controllers and automation systems used in residential, commercial and industrial mechanical systems.	
<i>Prerequisite(s): None</i>	
FM230	3.50 Quarter Credit Hours
Hydraulic and Pneumatic Systems	36/12/0
This course presents information about the maintenance of Hydraulic and Pneumatic Systems used in many commercial and industrial facilities. Topics covered in this course will include safety, hydraulic and pneumatic system basics, repair, and common uses.	
<i>Prerequisite(s): None</i>
